Smart Cities

Smart city: city that uses digital tech to improve
the quality of life for its residents

positive use
1) real life traffic monitoring
   - ex. WAZE, transtar,
   - traffic signals: making traffic signals blink/not work
     properly then work properly again
   - ex. police control traffic
2) energy conservation/management
   - energy efficient buildings: roofs, windows

3) public safety:
   - ex. surveillance sys, predictive ~~policing~~ policing, waste
     management
       - plastic takes 30yrs to disintegrate
       - anything made of paper can be composed

4) air quality sensors
   - ex. monitoring pollution
     water quality alerts

5) public transportation
   - ex. smart parking
